

BRAND IDENTITY GUIDELINES

StillScript

CONFIDENTIAL TRANSCRIPTS

Your Record. Your Privacy. Our Promise.

THE IDEA

Sound, settled into a record.

StillScript's mark joins the identity's two governing ideas in a single stroke. On the left, a waveform — the spoken word, a session, a testimony. It settles into a calm, continuous line: *still*, the composure of a private practice; *script*, the lasting written record.

The mark carries the whole story on its own, so the identity never needs to reach for a padlock, a vault, or a circuit board. Confidentiality is stated once, plainly, in the payoff line — the symbol is left free to feel dignified rather than defensive.

PRIMARY LOGO — HORIZONTAL LOCKUP

CONFIDENTIAL TRANSCRIPTS

Your Record. Your Privacy. Our Promise.

This is the primary lockup for marketing, landing pages, letterhead, and any use with generous room. The mark always leads the wordmark; never stack them in reverse order or separate them beyond the clear-space minimum below.

CLEAR SPACE

Maintain clear space equal to the height of the waveform (X) on every side. Nothing else — text, edges, other marks — may enter this margin.

MINIMUM SIZE

Never render the lockup narrower than this. Below it, drop the wordmark and use the symbol alone — it stays legible down to 16px / 16mm, the smallest app-icon and taskbar contexts.

COLOR PALETTE

Ink Navy

#0D1B2A — primary, wordmark & icon ground

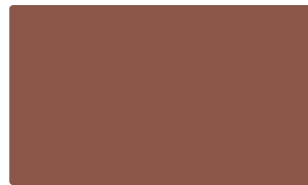

Slate

#44566B — secondary text, UI

Sage

#6B6F58 — supporting neutral

Terracotta

#8A5647 — sparing accent, warmth

Navy carries the identity everywhere it appears. Slate and sage are for supporting text, dividers, and UI chrome. Terracotta is used sparingly — a status dot, a single accent line — never as a dominant field color.

TYPOGRAPHY

Aa

Cormorant Garamond

Wordmark, headings, editorial moments

Aa

Source Sans 3

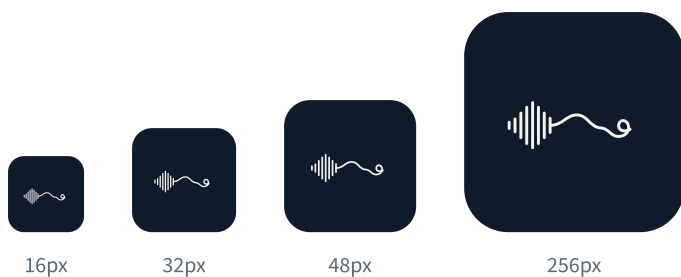

Body copy, UI, small caps labels

Confidential by design.

SECTION LABEL

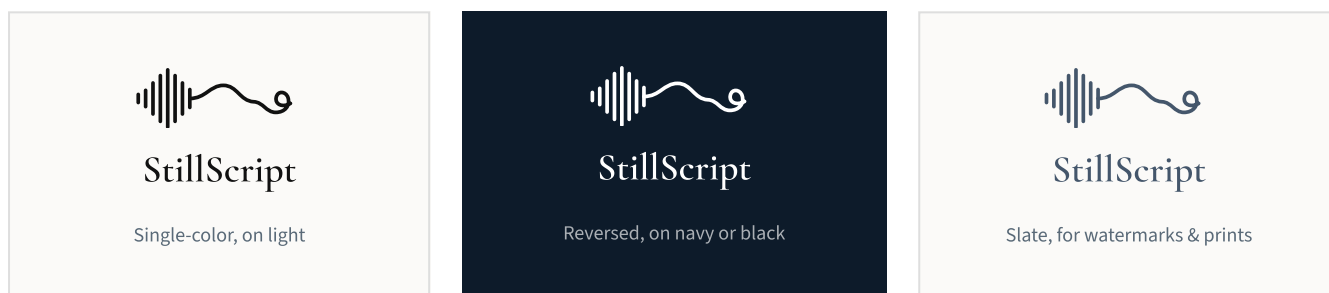

Body copy sets in Source Sans 3 at a comfortable size with generous line height, for the same reason the mark stays quiet: this is a tool professionals trust with sensitive material, not one that needs to perform.

APP ICONS

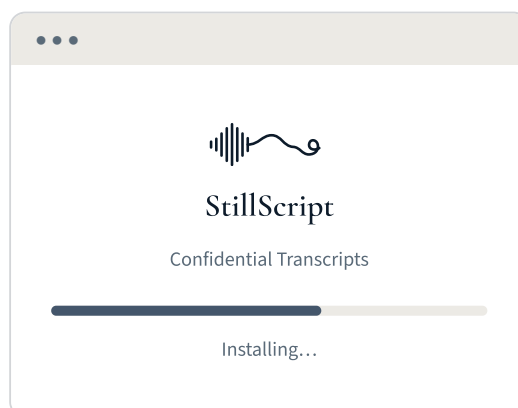

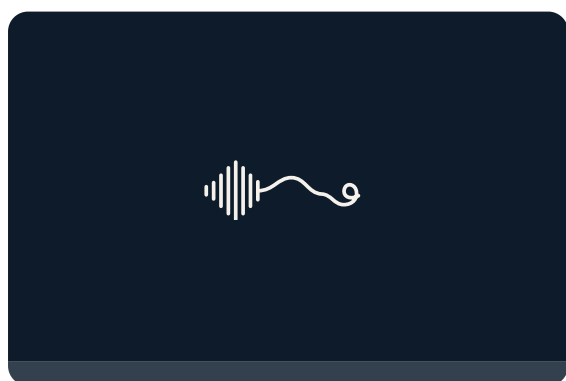

At 16–32px the icon is symbol-only, no wordmark, always on the navy ground with generous internal padding — never edge-to-edge.

MONOCHROME & REVERSED

APPLICATIONS

U S A G E

Do

Use the mark on navy, black, cream, or white grounds only.

Keep the full clear space on every side.

Drop to symbol-only below the minimum lockup width.

Don't

Don't recolor the mark outside this palette.

Don't add drop shadows, gradients, or outlines.

Don't stretch, rotate, or separate the mark from its baseline.
